

# AUTOMATION SOLUTIONS

THE PERFECT INTERACTION BETWEEN HUMAN AND MACHINE

Automatic Aluminum Cast Plate production line

We support your organization to become more productive and efficient by offering custom tailored automation solutions. After years of experience in the Aluminum Industry, FILL knows what is needed. Automation only makes sense if work processes are improved. Determining where to automate and which work processes must be improved is the key to our success.

## INTEGRATED ANALYZING LEADS TO THE OPTIMUM RESULT

FILL succeeds in developing the large potential of automation for each customer on an individual level. Throughout the concept development for your company, the most modern and sophisticated design tools, such as system simulation in real time, are used. This approach is well proven with numerous successful plant installations for demanding industries worldwide.

## OUR MANUFACTURING CAPABILITIES INCLUDE

- . From a stand-alone Plate Saw up to a fully automatic Cut-to-Size system
- . Automatic trim saws for the Aluminum Plate Mill Industry
- . Semi and fully Automatic Cast Plate Production lines
- . Automatic line-up between different manufacturing processes
- . Quality control, stacking and packaging systems
